

Master Plan Survey -

Please help Caseville Township plan for the future! Take an online survey today. Information collected will help guide the development of the Township's Master Plan. It will only take a few minutes, and your answers are anonymous.

To chart a path to a better future, communities must know what they want to become so they can create a path to get there. Master Plans are the tool that helps guide community leaders in achieving their long-term land use vision. Help the Township chart that vision. Please participate in the Caseville Township Master Plan survey.

Caseville Township is updating its land use master plan, and we need your help to guide the Township's future development. Land use plans look 15-20 years into the future, and this plan will serve as a guide to Township officials and developers on land use decisions and capital projects. To make the plan reflect the Township, we need to know what the year-round and summer residents find special about the community so that we can protect and enhance those special things while identifying where improvements are needed.

Public input is vital to successful master plans. Without it, these documents will fail and "sit on a shelf". The Master Plan Steering Committee needs your input to know what the public likes/doesn't like to help set the goals and objectives that will guide the Township's development over the next two decades.

Please complete the Community Survey that is available online at <https://www.surveymonkey.com/r/CasevilleTwpSurvey>. It will only take a few minutes.

The survey will be available online from Wednesday August 17th through Friday September 30th. It should take less than ten minutes to complete. Your survey answers will help to develop the plan that guide the development of Township for the next generation. Hard copies are also available at Township Hall. All responses are anonymous!
